1. Important Information

Import Information Notes are technical documents containing import requirements, and are for use by veterinary staff.

Please be aware that import conditions may be updated due to changes in policy or legislation. Please ensure that you check the current version of the Import Information Note online.

Please note that any links to legislation provided in this document are for information purposes only and may not be the most recent version. Please see the EU legislation paragraph below for further information regarding how to find consolidated versions of the legislation.

Importers should note that the information given relates only to animal health and public health conditions of import. It does not give guidance on other conditions that may need to be met.

The existing EU legislation that the UK already complies with has been incorporated into our domestic law as “retained EU law” under the European Union (Withdrawal) Act 2018. References in our guidance and certification to such EU instruments should be taken to be references to this “retained EU law”. Our current standards will remain in force, without amendment, in the immediate months after our EU exit as part of UK domestic law (apart from corrections to make the EU legislation fully operable).

- [The Import of, and Trade in, Animals and Animal Products \(Miscellaneous Amendments\) \(EU Exit\) Regulations 2020](#)
- [The Official Controls \(Animals, Feed and Food, Plant Health etc.\) \(Amendment\) \(EU Exit\) Regulations 2020](#)

2. Scope

Import conditions for display items from Third Countries.

Display items are defined in Regulation (EU) No 142/2011 as animal by-products or derived products intended for exhibitions or artistic activities.

Imports from the EU prior to 1st January 2021 must comply with the requirements set out in the Import Information Note for imports from the EU.

<http://apha.defra.gov.uk/official-vets/Guidance/bip/iin/index.htm>

Further information regarding changes to the import requirements from 1st January 2021 can be found on GOV.UK at the below link:

<https://www.gov.uk/guidance/importing-animals-animal-products-and-high-risk-food-and-feed-not-of-animal-origin-from-1-january-2021#import-from-an-eu-country-from-1-january-2021>

3. Production standards

Display items must have been produced and stored in accordance with the requirements of Annex VI, Chapter I, Section 2 of Regulation (EU) No 142/2011.

[Regulation \(EU\) No 142/2011](#)

4. Country of origin

The approved country list is laid down in Annex XIV, Chapter III, Section 2 of Regulation (EU) No 142/2011. Imports are only permitted from countries on the list.

This states that display items must originate from third countries referred to in the column “third countries’ list” of row 14 of Table 2 of Section 1 of Chapter II of Annex XIV of Regulation (EU) No 142/2011.

5. Health certification/documentation

Imports from third countries must be accompanied by a commercial document produced by the exporter, which must specify:

- a. the description of the material and the animal species of origin;
- b. the category of the material as defined in Regulation 1069/2009;
- c. the quantity of the material;
- d. the place of dispatch of the material;
- e. the name and the address of the consignor;
- f. the name and the address of the consignee.

6. Authorisation

Prior to importation authorisation must be obtained from the Animal and Plant Health Agency (APHA).

Some [general authorisations](#) (GAs) are available, but if you cannot comply with any of the GAs, you will need a specific authorisation. To apply for an authorisation please fill in an application form and send it to APHA.

- [Application form](#)

7. Approval or Registration of destination premises

Any operator, establishment or plant that generates, transports, handles, processes, stores, places on the market, distributes, uses or disposes of animal by-products including research and diagnostic samples, trade samples or display items must be approved or registered by APHA under Animal By-Products Enforcement Regulations before commencing operations. This requirement is provided for in Article 23 of Regulation (EC) No 1069/2009. Further information including the registration form is available on the GOV.UK website.

- [Regulation \(EC\) No 1069/2009](#)
- [Approval/registration procedures](#)

8. Transporters/couriers

Any independent hauliers (including couriers) of animal by-products including research and diagnostic samples, trade samples or display items should also be registered as described above. The registration process only needs to be done once for each haulier.

9. Veterinary checks

Consignments may only be imported through an approved Border Control Post (BCP). The person responsible for the consignment must give notice of the proposed entry of the consignment at least one working day before arrival (with a derogation to 4 hours before arrival if there are logistical constraints). The notification shall be made to the inspection staff at the BCP using the Import of products, animals, food and feed system (IPAFFS). Further information regarding IPAFFS can be found on [GOV.UK](#).

Any other electronic means agreed with the BCP to inform about the intended arrival of a consignment in advance are not to be considered as an official pre-notification.

Following satisfactory checks at the BCP (for which a charge is levied), consignments may then circulate freely within the EU unless there is a requirement for products to be monitored in accordance with [Commission Delegated Regulation \(EU\) 2019/1666](#). If the

consignment does not meet the import requirements, the consignment may be rejected and either re-exported or destroyed.

- [Further guidance on veterinary checks on animal products](#)
- [Border Control Posts](#)
- [Trade in Animals and Related Products Regulations 2011](#)

Until July 2021, imports from the EU do not need to enter Great Britain via a BCP and are not subject to veterinary checks. APHA will continue to carry out identity and physical checks on EU imports of live animals at their destination based on assessments of biosecurity and public health risks until July 2021.

10. Iceland, Norway, Liechtenstein and Switzerland

The EU has International Agreements with Iceland, Norway, Switzerland and Liechtenstein, which means that they implement EU veterinary legislation in relation to the movement of animal products. Therefore animal products from Iceland, Norway, Switzerland and Liechtenstein must comply with the same requirements applying to animal products from Member States.

11. Movement from the BCP to the point of destination

Following the veterinary checks referred to above, display items must be sent directly to the authorised user.

12. Disposal or re-export of display items

After the exhibition or the artistic activity has concluded display items must be

- a. re-dispatched to the third country of origin;
- b. dispatched to an EU Member State or third country, if such dispatch has been authorised by the competent authority of the Member State or third country of destination in advance; or
- c. disposed of in accordance with Articles 12, 13 and 14 of Regulation (EC) No 1069/2009.

13. Safeguard measures

Emergency safeguard action can be taken at very short notice to prohibit or restrict the importation of certain products from certain countries following an outbreak of disease or a public health issue. Information on the latest updates concerning disease outbreaks which may affect imports into the UK can be found on our Topical Issues page on the website.

Further information on the International and UK monitoring of animal diseases may be found on the animal disease monitoring website.

Importers can get the latest news about exotic notifiable disease outbreaks from the APHA subscription service.

- [Animal diseases: international and UK monitoring](#)
- [Exotic notifiable disease outbreak subscription service](#)

14. European Union legislation

Consolidated texts, which integrate the basic instruments of Union legislation with their amendments and corrections in a single, non-official document, are available. Each consolidated text contains a list of all legal documents taken into account for its construction.

You can search for consolidated texts by using the 'find results by document number' option on the [European Commission website](#). Once you have selected the relevant legislation, click 'document information', and then scroll down to 'all consolidated versions' and select the most recent version.

Please note that the consolidated text may not contain the latest amendment to the legislation, as it takes several weeks for this to be updated.

Texts provided in this section are intended for information only. Please note that these texts have no legal value. For legal purposes please refer to the texts published in the ['Official Journal of the European Union'](#).

15. Display items from EU Member States

Display items coming from EU Member States do not need to be licenced or authorised, but must comply with EU rules on animal by-products.

Display items coming from EU Member States do not need to enter through a BCP and do not require vet checks.

You may wish to include a copy of the facilitation letter with any consignments from EU countries.
