1. Important Information

Import Information Notes are technical documents containing import requirements and are for use by importers and veterinary staff.

Please be aware that import conditions may be updated due to changes in policy or legislation. Please ensure that you check the current version of the Import Information Note online.

Importers should note that the information given relates only to animal health and public health conditions of import. It does not give guidance on other conditions that may need to be met.

EU legislation as it stood on 31 December 2020 that the UK already complies with has been incorporated into our domestic law as “retained EU law” under the European Union (Withdrawal) Act 2018. References in our guidance and certification to such EU instruments should be taken to be references to this “retained EU law”. Our current standards will remain in force, without amendment, in the immediate months after our EU exit as part of UK domestic law (apart from corrections to make the EU legislation fully operable).

You can find further information on legislation, including Relevant EU Exit Statutory Instruments in the legislation section of this import information note.

Please note that any links to legislation provided in this document are for information purposes only and may not be the most recent version.

Further information regarding changes to the import controls from an EU country from 1 January 2021 can be found on GOV.UK at the below link:

<https://www.gov.uk/guidance/importing-animals-animal-products-and-high-risk-food-and-feed-not-of-animal-origin-from-1-january-2021#import-from-an-eu-country-from-1-january-2021>

2. Scope

Any consignment exported from Great Britain to a trading partner which is returning to Great Britain following a refusal of entry by a trading partner.

The returned goods policy only concerns rejections from the trading partner competent authorities. For rejections based on commercial reasons, the consignment must be treated as an import into the UK.

References to imports into Great Britain in this Import Information Note also includes imports into the Channel Islands and the Isle of Man.

References to trading partners includes non-EU, EU and EFTA countries. Import requirements from non-EU and EU countries will be differentiated, where required, in this Import Information Note.

Information regarding transits can be found on gov.uk:

<https://www.gov.uk/guidance/transiting-animals-and-animal-products-through-great-britain>

3. Country of dispatch

Any trading partner.

Please note that for the duration of the transitional import arrangements, the Trade in Animals and Related Products Regulations 2011 (as amended) require notification to be given to the Secretary of State for the return of GB origin products or live animals, that are **rejected by the Authorities, at an EU Border Control Post**. Re-entry must be authorised in writing by the Secretary of State for products and live animals that are assessed to be high risk. High risk means the products or live animals that are suspected of constituting a serious risk to human or animal health or animal welfare. For the duration of the transitional import arrangements, this risk assessment will be undertaken by APHA CIT. In practice, the GB exporter will need to contact APHA CIT (See section 10) who, subject to the completion of a risk assessment, will issue a written authorisation if deemed appropriate. For more information please see HMRC's website, cross-government guidance <https://www.gov.uk/guidance/returning-goods-to-the-uk>

4. Documentation required for returned POAO and Composite Products

These rules are in accordance with the requirements of [Retained EU Regulation 2019/2074](#) [and [Retained EU Decision 2019/2098](#)].

The following documents must be presented:

- (a) the original export certificate or document relating to the returned product or its authenticated copy.

Where it is not possible to provide the documents referred to above, the origin of the consignment may be authenticated in another way on the basis of documented evidence presented by the operator responsible for the consignment *

AND

- (b) the declaration from APHA or FSA agreeing to receive the consignment in GB indicating the place of destination; however, that declaration shall not be required where the consignment returns to its establishment of origin in GB which is located

in the same constituent territory of Great Britain as the BCP of arrival in Great Britain.

AND

c) in the case of a returned product not originally exported in a sealed container or where the original seal is broken for official control purposes, an official declaration from the trading partner Competent Authority or Public Authority indicating the following:

- i) Why the returned product was refused entry by the trading partner;
- ii) The place and date of unloading and reloading of the consignment;

AND confirming that:

- iii) the consignment did not undergo any handling other than unloading, storage and reloading;**
- iv) the unloading and reloading of the consignment was handled hygienically to avoid cross-contamination;
- v) The consignment was stored under hygienic conditions and at the required temperature for the relevant type of goods***;
- vi) Effective measures were put in place to avoid the contamination of the POAO with disease agents which cause transmissible animal diseases listed in Annex I to Directive 2002/99/EC during the unloading, storage and re-loading in the trading partner;
- vii) The place of any unloading, storage and re-loading in the trading partner was not subject to animal health movement restrictions due to transmissible animal diseases listed in Annex I to Directive 2002/99/EC during the unloading, storage and re-loading in the trading partner;]

OR

(d) in the case of a returned product originally exported in a sealed container and maintained an intact original seal, a declaration by the person responsible for the returned product that, since the returned product was originally exported, the conditions relating to storage and transport have been complied with in relation to the type of returned product [and that the content of the consignment has not been altered]. The declaration must also include the reasons for why the returned product was refused by the trading partner

* Where a consignment did not require a veterinary certificate or did not have a certificate for export, it is not necessary to provide one on return. However other documents should be presented (such as a commercial invoice) so that the OVS can establish that the consignment presented at the Border Control Post (BCP) is the one that was exported.

** Although not required by the legislation, it would be advisable to have an additional guarantee if the consignment has been handled for official control purposes, other than what is mentioned in point c(iii) declaring that the products were handled only to the extent necessary for the purposes of official controls, and in particular at the appropriate temperature required for the relevant type of product; and in a way that prevents cross contamination of the products during the controls. Also, the declaration should confirm that the container/vehicle was immediately resealed after the official controls were performed.

*** Although not required by the legislation, it would be advisable to have an additional guarantee if the consignment has been stored in a warehouse, other than what is mentioned in point c(v): that the products did not come into contact with any other animal products while present in the warehouse.

5. Documentation required for returned Animal By-Products

Retained EU Regulation 2020/797 amending Retained EU Regulation 142/2011 states the requirements for Animal By-Products and derived products originating from GB to return to GB following refusal of entry by a trading partner.

Chapter VI has been added in Annex XIV to Retained EU Regulation 142/2011 specifying these requirements.

The information below provides a guide to importers and Official Veterinary Surgeons. However, it is recommended that Official Veterinary Surgeons should seek advice from APHA CIT who will consider the returned consignment on a case by case basis.

The following documents must be presented:

1. Unpackaged or in bulk animal by-products and derived products following refusal of entry by a trading partner not listed in Annex XIV to Regulation 142/2011

- (a) the original or an authenticated copy export certificate relating to the returned product or its electronic equivalent;

Where it is not possible to provide the documents referred to above, the origin of the consignment may be authenticated in another way on the basis of documented evidence presented by the operator responsible for the consignment †

- (b) the declaration from APHA agreeing to receive the consignment in GB and indicates place of destination;
- (c) the consignment complies with the following conditions:

- it has remained sealed with an intact original seal (if the application of official seal prior to leaving Great Britain was mentioned in the original export certificate), or another official document issued by an authority in Great Britain;

AND

- it is accompanied by an official declaration from the trading partner Competent Authority or Public Authority indicating the reason for refusal.

[+ Where a consignment did not require a veterinary certificate or did not have a certificate for export, it is not necessary to provide one on return. However other documents should be presented (such as a commercial invoice) so that the OVS can establish that the consignment presented at the Border Control Post (BCP) is the one that was exported].

2. Unpackaged or in bulk animal by-products and derived products following refusal of entry by a trading partner listed in Annex XIV to Regulation 142/2011

Same requirements as in Section 1, paragraphs (a), (b) and bullet 2 of (c); however, where the products have been unloaded, stored, re-loaded in the trading partner; the original seal has been replaced or in the case of a returned product not originally exported in a sealed container, an official declaration from the trading partner Competent Authority or Public Authority indicating the following:

- the place and date of unloading, storage and re-loading and the seal number put on the container after reloading;
- the reasons for unloading and storage
- And confirming that:
 - the seal on the vehicle or container of the consignment was only broken for the purpose of official controls;
 - the products were handled only to the extent necessary, and in particular at the appropriate temperature required for the relevant types of animal by-products or derived products; and in a way that prevents cross contamination of the products during the controls;
 - the vehicle or container was immediately re-sealed after the official controls

3. Packaged Animal by-products and derived products following refusal of entry by a trading partner

Same requirements as in Section 1 and the packaging of the product has remained intact as compared to its state before exportation.

If the product was unloaded in the trading partner, the consignment should be accompanied by an official declaration from the trading partner Competent Authority or Public Authority attesting the following:

- the products have not been subjected to any handling other than unloading, storage and re-loading; AND
- were handled at the required temperature for the relevant type of animal by-product or derived product

6. Official controls at the border

Until the end of 2023, imports from the EU, and certain imports from Greenland and EFTA countries, do not need to enter Great Britain via a BCP and are not subject to veterinary checks at the border.

Consignments from trading partners (other than the EU, and some imports from Greenland and EFTA countries) may only be imported through an approved Border Control Post (BCP). The person responsible for the consignment must give notice of the proposed entry of the consignment at least one working day before arrival (with a derogation to 4 hours before arrival if there are logistical constraints). The notification shall be made to the inspection staff at the BCP using the Import of products, animals, food and feed system (IPAFFS). Further information regarding IPAFFS can be found on [GOV.UK](https://www.gov.uk). BCP checks will be required on EU goods from the end of 2023.

Any other electronic means agreed with the BCP to inform about the intended arrival of a consignment in advance are not to be considered as an official pre-notification.

Following satisfactory checks at the BCP (for which a charge is levied), consignments may then circulate freely within Great Britain. If the consignment does not meet the import requirements, the consignment may be rejected and either re-exported or destroyed.

- [Further guidance on veterinary checks on live animals](#)
- [Border Control Posts](#)

The Trade in Animals and Related Products Regulations 2011 ([TARP 2011](#)) (applicable in England) and EU Exit amendments to TARP 2011 can be found [here](#).

7. Movement of returned products in accordance with Articles 2 and 3 of Retained EU Regulation 2019/1666

The following only applies to returned consignments subject to monitoring procedures to its destination, as laid down in Retained EU Regulation 2019/1666. For returned POAO and Composite products, they will only be subject to monitoring procedures if an official declaration was issued by APHA to accept the movement of consignment to a destination other than the establishment of origin in the UK.

For consignments of POAO originating from and returning to the Crown Dependencies via a point of entry in Great Britain, monitoring of the transport from the border control post of arrival into Great Britain to the establishment at the place of destination should be

in accordance with the appropriate arrangements between the competent authorities in Great Britain and the Crown Dependencies.

[All unpackaged or in bulk Animal By-Products and derived products following refusal of entry by a trading partner not listed in Annex XIV to Regulation 142/2011, will be subject to monitoring procedures even if the destination is the establishment of origin in the GB].

- i. A returned product should not be removed from a BCP without the written authorisation of the Official Veterinary Surgeon there.
- ii. No person shall remove a returned product from a BCP unless it is contained in a leak-proof container or means of transport which has been sealed by Customs or by the Official Veterinary Surgeon at that Border Control Post.
- iii. The person responsible for a returned product removed in accordance with paragraphs (i) and (ii), and any carrier who has charge of it for the time being shall ensure that:
 - (a) it is conveyed directly to its EU destination in the sealed leak-proof container or means of transport sealed at the BCP **and**
 - (b) the Common Health Entry Document (CHED) issued for the returned product accompanies it until the returned product reaches its establishment of origin.
- iv. No person shall break the seals on the container or means of transport in which the returned product is conveyed, or unload the returned product, or split the consignment or part consignment which includes the returned product, or subject the returned product to any form of handling, until it reaches its establishment of origin.
- v. The operator responsible for the establishment at the place of destination shall, within one day upon arrival of the consignment, inform APHA of the arrival of the consignment at that establishment.

8. Safeguard measures

Emergency safeguard action can be taken at very short notice to prohibit or restrict the importation of certain animals from certain countries following an outbreak of disease or a public health issue. Information on the latest updates concerning disease outbreaks which may affect imports into the UK can be found on our Topical Issues page on the website.

Further information on the International and UK monitoring of animal diseases may be found on the animal disease monitoring website.

Importers can get the latest news about exotic notifiable disease outbreaks from the APHA subscription service.

- [Exotic notifiable disease outbreak subscription service](#)

9. Legislation.gov.uk

Consolidated legal texts, which integrate the basic instruments of retained EU legislation with their amendments and corrections in a single, non-official document, are available. Each consolidated text contains a list of all legal documents taken into account for its construction.

You can search for consolidated texts by inputting the 'document number' and 'year' and then clicking the option 'All UK Legislation (including originating from the EU)' on [legislation.gov.uk](https://www.legislation.gov.uk).

Once you press 'search', you can find the relevant legislation listed with the full title of the legislation. Once you have selected the legislation, you may see the following message at the top of the page:

"Changes to legislation: There are outstanding changes not yet made to XXX. Those changes will be listed when you open the content using the Table of Contents below. Any changes that have already been made to the legislation appear in the content and are referenced with annotations."

Please note that the consolidated text may not contain the latest amendment to the legislation, as it takes several weeks for this to be updated. EU Exit amendments to legislation may take several months too. We advise to read the legislation alongside the EU Exit amendments made in the below UK laws:

- [The Import of, and Trade in, Animals and Animal Products \(Miscellaneous Amendments\) \(EU Exit\) Regulations 2020](#)

- [The Official Controls \(Animals, Feed and Food, Plant Health etc.\) \(Amendment\) \(EU Exit\) Regulations 2020](#)
- [The Official Controls \(Animals, Feed and Food, Plant Health etc.\) \(Amendment\) \(EU Exit\) \(No. 2\) Regulations 2020](#)
- [The Aquatic Animal Health and Alien Species in Aquaculture, Animals, and Marketing of Seed, Plant and Propagating Material \(Legislative Functions and Miscellaneous Provisions\) \(Amendment\) \(EU Exit\) Regulations 2020](#)
- [The Animals, Aquatic Animal Health, Invasive Alien Species, Plant Propagating Material and Seeds \(Amendment\) \(EU Exit\) Regulations 2020](#)
- [The Trade in Animals and Animal Products \(Legislative Functions\) and Veterinary Surgeons \(Amendment\) \(EU Exit\) Regulations 2019](#)

Texts provided in this section are intended for information only. Please note that these texts have no legal value. For legal purposes please refer to the texts published in legislation.gov.uk.

Further information on changes in relation to EU legislation and UK law can be found on legislation.gov.uk. Please continue to use legislation.gov.uk to find EU retained law applicable to Great Britain. Please avoid using the EU Commission website for information on imports into Great Britain.
