Intra-Union Trade in Ovine and Caprine Animals for Slaughter Checklist (4955CKL)

July 2019
Contents

Checklist ........................................................................................................................................ 1
Certificate Reference number: .................................................................................................. 1
Number of Animals: .................................................................................................................. 1
Species: ........................................................................................................................................ 1
### Checklist

**Certificate Reference number:** ..............................................

**Number of Animals:** ...........................................................

**Species:** ..........................................................................

This checklist should be completed after reading the relevant Intra-trade animal health certificate and the Notes for Guidance of Official Veterinarians and Exporters and the Pre-export procedures paper (4950PEP).

The Health certificate may be signed if the answer to all the following questions is Yes (except question 11 which may be No). In the case of Questions 2 and 3; the answer must be YES to one or other of these questions.

<table>
<thead>
<tr>
<th>Question</th>
<th>Description</th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
</table>
| 1.       | Is each animal to be exported individually identified?  
- Do all of the animals have two ear tags with unique identification, with at least one being EID? | | |
| 2.       | Did you personally check the identity of each individual animal? If the answer is no, go to Question 3. See paragraphs 35-36 and Annex 3 of 4950PEP | | |
| 3.       | If the answer to Question 2 is no, were the identification procedures carried out by a lay employee of the Official Veterinarian practice and did you carry out a random sample check in accordance with paragraph 36 and Annex 3 of 4950PEP? | | |
| 4.       | Has Part I of the health certificate been completed with respect to the number of animals to be exported? | | |
| 5.       | Are all the animals to be exported identified at Part I.31 of the health certificate or on an attached schedule and has part I.31 or the attached schedule been fully completed (on the basis of the owner’s declaration) with respect to the number of animals, their sex, breed, and age? | | |
| 6.       | Do you have a fully completed and signed Written Declaration from the owner/owner’s agent 6195OED, or (if in an Assembly centre) a veterinary support document 5918SPT, | | |
| 7.       | Has Part I of the health certificate been fully completed with regard to:  
- the place of loading (including post town and post code);  
- the Member State and place of destination (including post town and post code);  
- transport (including registration no of vehicle/flight no of plane/name of ship if known);  
- consignor’s name and address;  
- consignee’s name and address;  
- At I.12 have you indicated by which option is applicable, and stated the place where the animals were obtained | | |

July 2019
8. Have all the animals identified in at Part I.31 of the health certificate and/or the attached schedule, been inspected within 24 hours of the intended time of loading and did they show no clinical signs of infectious or contagious disease and were fit to travel? Part II.2.1 of the health certificate refers. Guidance on examination/inspection is contained in paragraphs 28-33 of 4950PEP

9. Do you have a TRACES NDC which gives authority from APHA, Carlisle that Parts II.2.2 and II.2.3 of the health certificate can be signed?

**FOR CERTIFICATION DONE AT HOLDING OF ORIGIN:**

10. Have you checked the official movement records and other available farm records and can you confirm

   a) That no biungulate animals have been imported onto the holding, from a third country, during the last 30 days?

   b) That the animals have been continuously resident for at least 21 days prior to dispatch (or since birth if less than 21 days old), and

   c) That no sheep or goats have been introduced onto the holding in the last 21 days unless kept completely isolated from the rest of the holding in an officially approved isolation facility Part II 3.1 second indent of the health certificate refers

11. Have the animals been retagged? (Do they bear red tags)

12. If the answer to Question 11 is Yes:

   a) Are there complete records showing the new unique identification number cross referenced against the original unique identification?

   b) Are there movement records from the market (or other holding) listing the original full individual identification for all of these animals showing full traceability (not just the flock mark), when they were moved onto this farm?

   c) Using these movement records can you confirm that all of the animals moved onto this holding at least 21 days ago, and that there have been no other movements onto this holding within the last 21 days (21 day standstill and residency)?

   If any of the answers to the above a) to c) are NO then the sheep may not be eligible for export and advice should be sought from the Centre for International Trade

**FOR EXPORTS FROM AN ASSEMBLY CENTRE**

13. Do you have a completed 5918 SPT (for exports from an approved assembly centre to other Member States)

   a) Was this document checked BEFORE moving onto the Assembly Centre?

   b) Have the sheep been re-tagged with red ear tags?

   If yes to b), was this done BEFORE they moved on to the Assembly Centre?

   If they were re-tagged after arrival at the Assembly Centre then they may not be eligible for export, please contact the Centre for International Trade for advice

Date ......................... Signature ........................................................................................................
Name (Block Letters)........................................................................................................
Address.............................................................................................................................
Name of the owner and Address of the holding to which the above check list Certificate refers:

Name ..............................................................................................................................................
Address of holding ........................................................................................................................
........................................................................................................................................................

NB.
1. Animals which are unfit to be transported to their intended destination or which do not meet the animal health requirements of the certificate must be rejected from the certification.
2. Where you have rejected animals on the grounds that they are unfit to be transported to their intended destination, a Notice under the Welfare of Animals (Transport) (England) Order 2006 must be served in respect of animals so rejected.

This check list must not accompany the animals exported from Great Britain and should be retained by the Official Veterinarian.
