

Tuberculin Test Chart

APPROVED VETERINARY SURGEON

Herd Reference Number

--	--	--	--	--	--	--	--	--	--

THIS FORM IS ALSO AVAILABLE IN WELSH

Sheet of

Notes:

- The number of animals not tested must be entered at question 8(a) of Form TB52
- The correct date of birth or age of each animal should be shown separately. This is particularly important for reactor and IR animals
- Where added animals and inconclusive reactors are tested at this test they must be clearly identified in the Remarks column. It should also be stated whether they are in isolation.

Abbreviations: S.O. = Some oedema, C. = Circumscribed, + = Positive, - = Negative

FOR APPROVED VETERINARY SURGEON USE	Stamp
No. of animals tested on this page: _____	
Signature: _____	
Date test commenced: _____	

Official animal identity	Breed	Date of Birth or Age	Sex	Group	Skin measurements m.m.
